WORK EXPERIENCE

Business Analyst

Radiance

Nov 2023 – Aug 2024

- Accelerated self-service access to performance metrics, reducing **reporting** cycles from 6 hours to under 90 minutes, by writing **SQL** queries to consolidate cross-functional sales and marketing data into automated **Tableau** dashboards.
- Delivered **data-driven**, actionable insights identifying \$180K+ in unrealized revenue, influencing cross-functional **stakeholders** to adopt process changes that improved pipeline velocity by 34%.
- Analyzed weather-forecasting error across competing vendors using statistical methods and **Tableau** visualizations, identifying the most accurate provider and reducing associated company expenditure.

Business Development Manager

PropSquare Lifespaces

Mar 2022 – Nov 2023

- Mentored and developed a team of 8 representatives by sharing analytics best practices and building daily performance **Tableau** dashboards, driving 31%+ team output growth.
- Led analytical projects from definition through delivery by designing advanced Excel and **SQL**-based forecasting models, providing weekly revenue visibility and strategic guidance to leadership.
- Standardized operational processes across teams using documented **workflows** and **automated reporting**.

Senior Business Development Associate

Think and Learn (Byju's)

Jul 2020 – Mar 2022

- Improved B2C customer conversion rates from 12% to 19% by analyzing customer behavior **metrics** and translating complex data into data-backed contact cadences.
- Maintained 89%+ pipeline forecast accuracy across a 100+ account portfolio; synthesized complex data into monthly revenue **reports** for leadership visibility.
- Tracked and analyzed 50+ concurrent deals; identified win-rate patterns and deal velocity **trends** to inform strategic discussions.

Inside Sales Associate

EdzeQ Technologies

Dec 2018 – Jul 2020

- Generated \$48K+ in incremental revenue by analyzing competitive landscape and marketing data across 8 regions, achieving a 22% call-to-meeting conversion rate through strategic, **data-driven** targeting.

PROJECTS

F1 Cost-Cap Analytics

MS Capstone, Lewis University

- Built and maintained **Tableau** dashboards on an SQL Server star schema covering constructor revenue across 11 seasons, enabling **stakeholders** to correlate financial constraints with on-track results.

AegisIQ Data Warehouse Design

Graduate Coursework, Lewis University

- Designed a centralized data warehouse for AegisIQ (150 staff, four sites) against **reporting requirements**, and created supporting documentation that reduced rework in requirements reviews by 25%.
